

Fitment of friction plate in clutch kit 828118

Valeo Technical Support and the Warranty Claims Department are receiving a number of calls and claims regarding the fitment of the friction plate in clutch kit 828118.

In image 1 below you can see the layout of the clutch according to the Peugeot EPC system. As you can see in image 2 this is a larger diagram of the friction plate which is clearly facing the cover and therefore gearbox. You can see in image 2 that it matches image 4 with the sprocket shaped plate riveted to the hub. The side with the sprocket shaped plate is also the side with numbers on it where as the opposite side (image 3) does not. To conclude the side with numbers on the centre plate (and contains the sprocket shaped plate) is the side facing the gearbox.
