

Tension Pulley

fits:

*Audi A6 / Avant / Quattro (Ref. no. 074 109 243 F)
VW Transporter (T4) / Syncro (Ref. no. 074 109 243 F)
VW LT (Ref. no. 074 109 243 F)*

Ref. no. 074 109 243 F

>> PROBLEM:

The tension pulley loosens.

>> CAUSE:

The bolt required by the vehicle manufacturer can loosen. Consequently, the position of the tension pulley is allowed to change, which can (in the worst case) cause serious engine damage.

>> SOLUTION:

febi bilstein offers a safe alternative!

febi bilstein now supplies the tension pulleys febi 14732, 11559 and 11560 with a special bolt featuring a micro-encapsulated safety device. The safety device on the bolt causes the bolt to remain torqued to specifications, and it cannot loosen prematurely. This prevents warranty claims and engine damage.

i.e. febi no. 11559

Ref. no. 074 109 243 F

>> ATTENTION:

The torque of the febi special bolts is 20 ± 1.5 NM
