

003 Installation of brake pads for the Peugeot 207, 307, Partner

Area of use			
Vehicle type	Passenger	Model	206, 207, 307, Partner
Car Manufacturer	Peugeot	Product	PV Disc Brake Pads
Reference	573184	Type of fuel	Diesel, Petrol

Problem	Fault characteristics
Squeaking of brakes on the front axle during gentle braking or shortly before the vehicle comes to a stop.	High-frequency vibrations due to the friction between the brake pad and brake disc.

Solution
In order to counter the squeaking of brakes on the front axle, the brake pads must be fitted in the right position (see image).
